To: Yvette DePeiza  
From: Steven Soule, Director of Operations – Berkshire Hills Regional School District  
RE: PWS #1113016, Service Line Inventory Notification Certification

To Whom It May Concern:

As per our submitted Service Line Inventory we are uncertain as to whether we have pipes servicing the high school building that contain lead or galvanized materials. Because of our uncertainty we have notified the public with this letter effective June 13, 2025, by posting it on the school district website. Additionally, we will undergo an investigation to determine the material underground servicing the high school within the next six months. Once this investigation is concluded we will make our findings public and submit the findings to the DEP.

Sincerely,

Steven T. Soule

Director of Operations

Berkshire Hills Regional School District
